

Polymorphism Tasks:

=====

Q1:

Project : EmployeeDetails
Package : org.emp
Class : Employee
Methods : empld()

Description

You have to overload the method empld()
based on different datatype in arguments.

Q2:

Project : CompanyDetails
Package : org. company
Class : Company Info
Methods : companyName()

Description

You have to overload the method
companyName() based on different Number of arguments .

Q3:

Project : MyPhone
Package : org.phone
Class : Phone
Methods : phoneInfo()

Description

You have to overload the method phoneInfo()
based on different datatype order in arguments.

Q4:

Project : BankDetails
Package : org.bank
Class : Bank Info
Methods : saving() , fixed() , deposit()

Class :AxisBank
Methods : deposit()

Description:

You have to override the method deposit in AxisBank.

Q5:

Project : EducationInformation
Package :org.edu
Class : Education
Methods :ug(),pg()

Class :Arts

Methods :bSc(),bEd(),bA(),bBa(),ug(),pg()

Description:

You have to override the method ug(),pg() in Arts.

Employee.java

```
1 package org.emp;
2
3 public class Employee {
4     private void empid(int id) {
5         System.out.println("Employee Id : " + id);
6     }
7     private void empid(String name) {
8         System.out.println("Employee Name: " + name);
9     }
10    private void empid(long phno) {
11        System.out.println("Employee Contact: " + phno);
12    }
13    private void empid(String des, String role)
14    {
15        System.out.println("Designation & Role: " + des + "\t" + role);
16    }
17    public static void main(String[] args) {
18        Employee e = new Employee();
19        e.empid(174524);
20        e.empid(9988445510254571);
21        e.empid("Rajan");
22        e.empid("Tester", "SME");
23
24    }
25 }
26
```

Console

<terminated> Employee (3) [Java Application] C:\Users\Lenovo\Downloads\Compressed

Employee Id : 174524
Employee Contact: 998844551025457
Employee Name: Rajan
Designation & Role: Tester SME
